Everything works better in the right light.

SageGlass® automatically optimizes interior light levels without ever blocking the view.

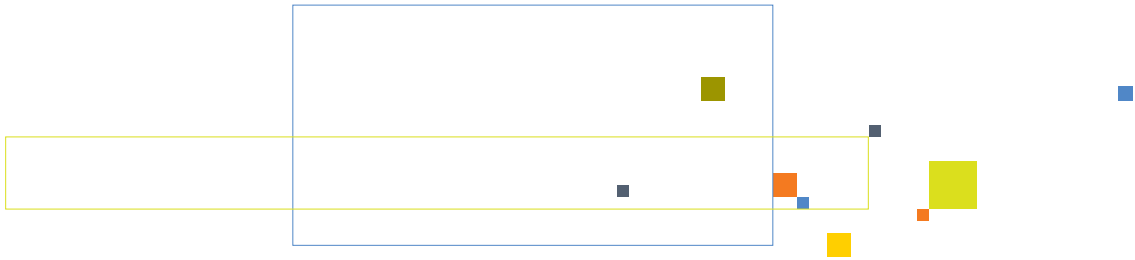

SageGlass® **clear**

Glass that tints

SAGE™

Design spaces that are more comfortable, productive and energy-efficient.

Find out more about SageGlass for windows, skylights and curtain walls by visiting SageGlass.com. Or, come see SageGlass in action at *Exhibit 4353N at Greenbuild*.

SAGE

Everything works better in the right light.

SageGlass® automatically optimizes interior light levels without ever blocking the view.

Only SageGlass electronically tintable glass lets you automatically control sunlight entering your space — at all hours, in all seasons, in every weather condition. And when the day is brightest, it gets dark like sunglasses but never opaque, so you always keep your view.

SageGlass is more comfortable for building occupants, saves on HVAC first costs, reduces energy use, and lessens the impact of your building on the environment. Brilliant.

Design spaces that are more comfortable, productive and energy-efficient.
